

ARTADYS

Insight Global Live Engine

ARTADYS Global Neurosciences cover LIVE VIDEO STREAMING by satellite, drones or terrestrial data collection, the human behavior and the internet of things of brands, manifestations, concerts, sports events, crisis, etc. The final idea is to collect and manage data from the sky and terrestrial and make predictions about humans and things.

With partners currently in USA, France and India ARTADYS aims to work internationally and seeks help in defining their value proposition, target market and decide which path to follow: a B2C and/or B2B business model
